	Median PBIR (IQR)	Min PBIR	Max PBIR
ED visits without a hospitalization	168 (70.7-295.9)	0.0	2921.4
Hospitalizations	178.7 (89.6-296.9)	0.0	4066.6
Total Acute Care Use Events	354.6 (167.5-596.2)	0.0	6587.4

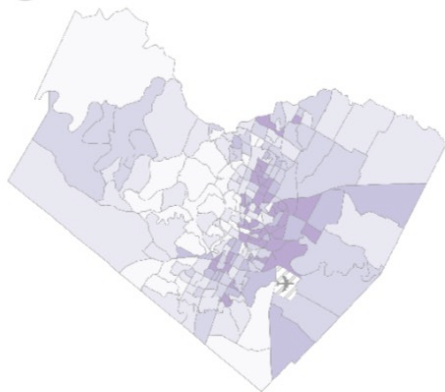

*Per 100,000 person-year

PRIB = population-based incidence rate

Supplemental Figure 1.

Maps of calculated acute exacerbation of COPD population-based incidence rates for emergency department visits without a hospitalization (A), hospitalizations (B), and total acute care use (C; emergency department visits + hospitalizations). In addition, this figure shows maps of percent non-white population (D), percent living under 200% federal poverty line (E), and median household income in dollars (F) derived from the 2019 American Community Survey census tract data.
